

Pearson BTEC Level 3 Nationals Certificate, Extended Certificate,
Foundation Diploma, Diploma, Extended Diploma

Thursday 14 January 2021

Morning (Time: 2 hours)

Paper Reference **31761H**

Information Technology

Unit 2: Creating Systems to Manage Information

Part B

You must have:

activity6.rtf, activity7.rtf, partB_database.accdb or partB_database.mdb

Instructions

- **Part A** and **Part B** contain the material for the completion of the set tasks under supervised conditions.
- There are 40 marks for **Part A** and 26 marks for **Part B**, giving a total mark for the set tasks of 66.
- **Part A** and **Part B** are specific to each series and this material must be issued only to learners who have been entered to take the tasks in the specified series.
- Learners **must only** have access to **Part B** during this examination session.
- This booklet should be kept securely until the start of the 2-hour supervised assessment period.
- **Part A** materials **must not** be accessed during the completion of **Part B**.
- **Part A** and **Part B** should be submitted together for each learner.
- This booklet should not be returned to Pearson.
- Answer **all** activities.

Information

- The total mark for this paper is 26.

Pearson

Instructions to Invigilators

This paper must be read in conjunction with the unit information in the specification and the *BTEC Nationals Instructions for Conducting External Assessments (ICEA)* document. See the Pearson website for details.

Refer carefully to the instructions in this task booklet and the *BTEC Nationals Instructions for Conducting External Assessments (ICEA)* document to ensure that the assessment is supervised correctly.

The 2-hour **Part B** set task must be carried out under examination conditions.

The database and electronic templates for Activities 6 and 7 are available on the website for centres to download for candidate use.

Learners must complete this task on a computer using the templates provided and appropriate software. All work must be saved as PDF documents for submission.

Invigilators may clarify the wording that appears in this task but cannot provide any guidance in completion of the task.

Invigilators should note that they are responsible for maintaining security and for reporting issues to Pearson.

Maintaining Security

- Learners must not bring anything into the examination environment or take anything out.
- Centres are responsible for putting in place appropriate checks to ensure that only permitted material is introduced into the examination environment.
- Internet access is **not** permitted.
- Learners' work must be regularly backed up. Learners should save their work to their folder using the naming instructions indicated in each activity.
- During any permitted break, and at the end of the examination, materials must be kept securely, and no items removed from the supervised environment.
- Learners can only access their work under supervision.
- User areas must only be accessible during the examination session and only by the individual learners.
- Any materials being used by learners must be collected in at the end of the examination.
- Following completion of **Part B** of the set task, all materials must be retained securely for submission to Pearson.
- **Part A** materials must not be accessed during the completion of **Part B**.

Outcomes for Submission

Each learner must create a folder to submit their work.

The folder should be named according to this naming convention:

[Centre #]_[Registration number #]_[surname]_[first letter of first name]_PartB

Example: Joshua Smith with registration number F180542 at centre 12345 would have a folder titled

12345_F180542_Smith_J_PartB

Each learner will need to submit 3 PDF documents **and** their final database within their folder.

The 3 PDF documents should use these file names:

Activity 6: activity6_[Registration number #]_[surname]_[first letter of first name]

Activity 7: activity7_[Registration number #]_[surname]_[first letter of first name]

Activity 8: activity8_[Registration number #]_[surname]_[first letter of first name]

An authentication sheet must be completed by each learner and submitted with the final outcomes.

The work should be submitted no later than 18 January 2021.

Instructions for Learners

Read the set task information carefully.

Plan your time carefully to allow for the preparation and completion of all the activities.

Internet access is **not** allowed.

You will complete this set task under supervision and your work will be kept securely at all times.

You must work independently throughout the examination and **must not** share your work with other learners.

Your invigilator may clarify the wording that appears in this task but cannot provide any guidance in completion of the task.

Part A materials **must not** be accessed during the completion of **Part B**.

Outcomes for Submission

You must create a folder to submit your work.

The folder should be named according to this naming convention:

[Centre #]_[Registration number #]_[surname]_[first letter of first name]_PartB

Example: Joshua Smith with registration number F180542 at centre 12345 would have a folder titled

12345_F180542_Smith_J_PartB

You will need to submit 3 PDF documents **and** your final database within this folder.

The 3 PDF documents should use these file names:

Activity 6: activity6_[Registration number #]_[surname]_[first letter of first name]

Activity 7: activity7_[Registration number #]_[surname]_[first letter of first name]

Activity 8: activity8_[Registration number #]_[surname]_[first letter of first name]

You must complete an authentication sheet before you hand your work in to your invigilator.

Part B Set Task Brief

You are advised to spend 10 minutes reading the Task Scenario and the activities you are to complete.

You may make notes and/or highlight information to use in the completion of the documents you need to produce for your task.

Task Scenario

'Smart Art' has partially developed a database that will eventually merge with the database you created in **Part A**.

A piece of art must have a name.

A piece of art must have a selling price of at least £100 and no more than £2000.

A piece of art must belong to an artist.

A piece of art is either available or sold.

Sales are analysed.

Artists are given a rating of 1, 2 or 3. The highest rating is 1.

The database will record information about the pieces of art, sales and ratings.

Part B Set Task

You must complete ALL activities within the set task.

Produce your documents using a computer.

Save your documents in your folder ready for submission using the formats and naming conventions indicated.

Activity 6: Forms (1 hour 10 minutes)

Note

- The structure of the tables provided should not be changed in any way e.g. do not add validation to the tables, do not change data types.
- You will **only** be required to use tblArtist and tblArt.

Create an efficient interface that will facilitate database input by producing:

(a) an input form to add a piece of art.

- The form should be ready for data entry.
- The name of the piece of art must be present.
- The selling price must be within the specified range.
- The piece of art must be assigned a valid artist.
- Valid data should be appended to the art table, a save message should display and the form should be cleared ready for the next data entry.
- A suitable error message should appear where invalid data has been used.

(b) an input form to analyse sales and add an artist's rating.

- The form should **not** include validation for any fields.
- The form should **not** include an automated routine to save the data.
- There must be a combo box in order to select the artist.
- There must be a combo box in order to select the rating.
- Once the user selects an artist, information for that artist should be generated and displayed in fields on the form:
 - the artist's email
 - the total number of pieces of art
 - the number of pieces of art sold
 - the highest price for a piece of art
 - the lowest price for a piece of art
 - the total amount of money made from sales.

Evidence your interface as screenprints using the given **activity6.rtf** template.

Your screenprints must show:

- the **DESIGN** view and **FORM** view of all the forms you have created
- the **DESIGN** view of any queries you have created and used with the forms including fields and criteria
- the **DATASHEET** view of any queries you have created and used with the forms
- details of any calculations, validation and macros/code you have created and used with the forms.

Ensure sufficient information is provided to allow a competent third party to maintain the database.

Save the evidence of your interface as a PDF in your folder for submission as **activity6_[Registration number #]_[surname]_[first letter of first name]**

You are advised to spend 1 hour and 10 minutes on this activity.

(Total for Activity 6 = 14 marks)

Activity 7: Interface testing (20 minutes)

Test the interface of your relational database using suitable test data (normal, erroneous and extreme as appropriate).

You must not add validation to any of the tables.

You must provide evidence of **form level** testing that proves:

1. the art input form is ready for data entry when the form opens
2. the name of the piece of art must be present
3. the selling price of the piece of art cannot be above the top of the range
4. the selling price of the piece of art cannot be below the bottom of the range
5. the piece of art must be assigned to a valid artist
6. a record will save in the art table if all of the required data is present and valid
7. these details appear for the artist selected on the sales form:
 - the artist's email
 - the total number of pieces of art
 - the number of pieces of art sold
 - the highest price for a piece of art
 - the lowest price for a piece of art
 - the total amount of money made from sales.

Complete the test log to show how you have tested your input forms using the given **activity7.rtf** template.

Save your test log as a PDF in your folder for submission as **activity7_[Registration number #]_[surname]_[first letter of first name]**

You are advised to spend 20 minutes on this activity.

(Total for Activity 7 = 6 marks)

Activity 8: Interface evaluation (20 minutes)

Evaluate your interface.

You should consider the quality, performance and usability of the interface you have created in terms of how well it ensures:

Art form

- the art form is ready for data entry when the form opens
- the name of the piece of art must be present
- the selling price of the piece of art cannot be above the top of the range
- the selling price of the piece of art cannot be below the bottom of the range
- the piece of art must be assigned to a valid artist
- a record will save in the art table if all of the required data is present and valid

Sales analysis form

- these details appear for the artist selected on the sales form:
 - the artist's email
 - the total number of pieces of art
 - the number of pieces of art sold
 - the highest price for a piece of art
 - the lowest price for a piece of art
 - the total amount of money made from sales.

Save your evaluation as a PDF in your folder for submission as

activity8_[Registration number #]_[surname]_[first letter of first name]

You are advised to spend 20 minutes on this activity.

(Total for Activity 8 = 6 marks)

TOTAL FOR PART B = 26 MARKS
